Resume

06-01-2026

Name：Yu Kiryu

■ Summary of Qualifications

Versatile Consultant with 5 years of experience across 10 cross-functional projects within Global consulting firms. Proven track record in both technical and business domains, including:

- ✓ SAP Consulting: End-to-end delivery of system migrations and greenfield implementations (Design to Go-live).

- ✓ Project Coordination / PMO: Partnered with Senior Management to conduct strategic research and translate complex specifications into structured project plans.

- ✓ Business Transformation: Optimized logistics workflows to improve operational efficiency. I bring a unique blend of technical depth and business process optimization skills.

- ✓ Vendor & Offshore Management: Led negotiations with external vendors and coordinated seamlessly with offshore teams (e.g., India and China) to ensure global project alignment.

- ✓ IT Infrastructure: Managed OS-layer operations and maintenance for large-scale manufacturing systems.

■ Employment History

01/2024 - 05/2025 EY Japan - SAP Consultant (Full-time)
09/2021 - 12/2023 Kyndryl Japan - Senior Associate (Full-time)
04/2020 - 08/2021 IBM Japan - Junior Associate (Full-time)
04/2019 - 03/2020 Kyoto University - Teaching Assistant (Part-time)

Period	Project Overview & Responsibilities
03/2025 - 05/2025	■ Internal SAP Operations & Project Support Key Responsibilities: • **Cross-Functional Collaboration:** Partnered with multiple Managers and Senior Managers to conduct in-depth product specification research and strategic information gathering. • **Stakeholder Management:** Led negotiations with external vendors and coordinated seamlessly with offshore teams in India to ensure project alignment. • **Technical Documentation:** Authored and maintained high-quality project documentation and internal reporting materials. • **System Administration:** Managed the maintenance and optimization of the in-house SAP system to ensure operational stability. • **Project Continuity:** Provided critical follow-up support and resolved legacy issues from previous projects to maintain service excellence.

06/2024 - 02/2025	■ Food & Beverage Manufacturer: HW/SW Refresh & SAP HCM EHP6 Upgrade Support
	
	◎Project Overview: Executed a large-scale system upgrade and hardware/software refresh for an existing SAP HCM system to ensure long-term stability and address the expiration of product maintenance support.
	
	Key Responsibilities & Achievements:
	• **Project Management (PMO):**
	  ○ Developed the WBS and infrastructure team schedules.
	  ○ Managed task allocation and progress tracking to ensure timely delivery of milestones.
	• **SAP Basis & Infrastructure:**
	  ○ Conducted impact analysis for the Enhancement Pack (EHP) application on existing business processes.
	  ○ Spearheaded the SAP system roadmap development and provided quality assurance for system architecture and

	migration strategy documents.
	
	  o Supported server configuration design and environment setup, including database (MS SQL) installation.
	
	  o Executed the technical upgrade and data migration for the SAP landscape.
	
	 • **Knowledge Transfer :**
	
	  o Facilitated knowledge transfer and provided technical support to the maintenance and operations team to ensure a smooth transition.

04/2024	■ Internal GenAI Solution Assessment (Japan-Malaysia Collaboration)
	
	Key Contributions:
	
	 • **Facilitated GenAI Knowledge Transfer:**
	
	  o Spearheaded the technical exchange sessions between EY Japan and Malaysia to evaluate a Microsoft Generative AI solution designed for SAP reporting automation.
	
	 • **Technical Localization & Concept Evangelism:**
	
	  o Bridged the language and technical gap by localizing complex GenAI case studies into Japanese. Enabled local stakeholders to visualize how AI could analyze SAP export data and automate insight generation.

03/2024 - 05/2024	■ Education Industry: AWS Cloud Migration & SAP ERP Infrastructure Implementation ◎Project Overview**:** Executed migration and greenfield implementation on AWS to replace an on-premises SAP environment. The project aimed to enhance system stability, reduce operational costs, and improve overall maintenance efficiency. Key Responsibilities & Achievements: • **Cloud Strategy & Cost Management:** 　o Performed comprehensive cloud running cost simulations and developed preliminary budget estimates for the AWS environment. 　o Provided strategic support for product selection to ensure compatibility and performance in the cloud-based system migration. • **Systems Implementation & Technical Execution:** 　o Spearheaded the end-to-end setup and configuration of the AWS infrastructure, SAP ECC, and HANA DB. 　o Optimized the system landscape to leverage cloud-native scalability and reliability. • **Operational Excellence & Knowledge Transfer:** 　o Redesigned and optimized operational workflows and documentation to align with cloud-best practices. 　o Conducted technical training sessions for end-users and facilitated a seamless knowledge transfer to the operations team.
01/2024 - 03/2024	■ Manufacturing Industry: Supply Chain Optimization (U.S. Oil & Gas) ◎Project Overview**:** Streamlined and optimized logistics processes for a major U.S.-based Oil & Gas company to enhance operational efficiency and reduce supply chain bottlenecks. Key Responsibilities & Achievements: • **Process Diagnostic & Benchmarking:**

	o Conducted the "As-Is" mapping of end-to-end logistics flows. Identified that operational inefficiencies were primarily driven by complex manual workflows and user proficiency gaps in SAP.
	
	• **Strategic Recommendations:**
	   o Formulated improvement strategies focusing on Human-Centric Optimization. Redesigned operational guidelines to bridge the gap between user behaviors and SAP standard logic.
	
	• **Localization Support:**
	   o Localized and translated global process flows into Japanese
	
	• **Deliverable Management:**
	   o Supported the Final Project Report, providing a definitive roadmap of findings and recommendations. This document currently serves as the client's strategic reference for ongoing and future system enhancements.

11/2023	■ Manufacturing Industry: Cloud-to-Cloud System Migration (IBM Cloud to Microsoft Azure)
	
	◎Project Overview: Participated in a large-scale strategic system migration from IBM Cloud to Microsoft Azure for a leading Japanese manufacturer to optimize cloud infrastructure and leverage Azure's ecosystem.
	
	Key Responsibilities & Achievements:
	• **Backup & Recovery Architecture:**
	   o Supported the Backup Strategy & Design phase to ensure data integrity and system availability during and after the cross-cloud migration.
	   o Defined backup policies, retention periods, and recovery time objectives (RTO/RPO) aligned with the client's business continuity requirements.
	• **Migration Planning:**
	   o Provided technical advisory on infrastructure compatibility

	between IBM Cloud and Azure environments. ○ Coordinated a smooth handover of daily tasks and project knowledge to the incoming colleague

09/2023
-
10/2023
	■ Manufacturing Industry: SAP Infrastructure Maintenance & System Split
	
	◎Project Overview: Supported a project for a major Japanese manufacturer involving SAP PI (Process Integration) system copy, upgrade, and a Dual-Stack Split to optimize system architecture.
	
	Key Responsibilities & Achievements:
	
	 • **Technical Execution Support:**
	  ○ Assisted the lead consultant in the hands-on execution of the Dual-Stack Split and SAP system copy procedures.
	  ○ Supported the technical upgrade process, ensuring tasks were completed according to the project timeline.
	 • **Documentation & Quality Control:**
	  ○ Authored detailed step-by-step technical manuals and work instructions to ensure the accuracy and safety of system operations.
	  ○ Maintained rigorous documentation of system logs and configuration changes during the project lifecycle.

04/2023
-
06/2023
	■ Manufacturing: Windows System Implementation
	
	◎Project Overview: Provided technical support for the deployment of a new Windows Server environment within a VMware Cloud on AWS architecture for a leading Japanese manufacturer.
	Key Responsibilities & Achievements:
	 • **Environment Provisioning Support:**
	  ○ Collaborated with the primary consultant to execute the setup and configuration of Windows system instances.
	  ○ Assisted in the baseline configuration and verification of the server environment to ensure alignment with project specifications.

	Technical Execution:
	      ○ Performed hands-on configuration tasks under the guidance of the lead engineer, focusing on stable system initialization.
	      ○ Supported the documentation of technical settings and environment parameters for post-implementation maintenance.

01/2023
-
08/2023
	■ Manufacturing: SAP S/4HANA Conversion (Sandbox environment)
	
	◎Project Overview: Participated in a large-scale system transformation project for a major manufacturer, focusing on the technical conversion from SAP ERP to SAP S/4HANA.
	
	Key Responsibilities & Achievements:
	• **Conversion Execution Support:**
	      ○ Assisted in the technical execution of the S/4HANA conversion process, including Support Package Stack applications and system upgrades.
	      ○ Supported hands-on Basis activities under the supervision of the lead consultant to ensure a stable transition to the S/4HANA environment.
	• **System Optimization & Verification:**
	      ○ Conducted post-conversion technical checks and verification tasks to maintain system integrity.
	      ○ Provided logistical and technical support during the critical cutover phases, contributing to the overall reliability of the system upgrade.

05/2022 - 06/2022	■ Internal Training Environment: SAP ERP & S/4HANA Implementation ◎Project Overview: Established an internal training landscape by deploying SAP ERP and S/4HANA systems on Azure Cloud, providing a sandbox environment for consultant skill development. Key Responsibilities & Achievements: • **Cloud Environment Provisioning:**

	o Assisted in the end-to-end setup of the Azure infrastructure required for SAP hosting.
	   o Performed the installation and initial configuration of SAP ERP and S/4HANA instances for internal training purposes.
	 • **System Maintenance:**
	   o Managed basic administrative tasks to ensure the availability and stability of the training environment.
	   o Developed simplified operation manuals to help other internal users navigate the newly established system.

04/2021
-
12/2022
	■ Manufacturing: Infrastructure Operations & Automation
	
	◎Project Overview: Managed comprehensive system operations for a major manufacturer, focusing on incident/issue management and operational efficiency across multi-cloud environments (VMware, IBM Cloud, and AWS).
	
	Key Responsibilities & Achievements:
	 • **Operational Automation:**
	   o Led the implementation and adoption of Red Hat Ansible Tower to automate routine operational tasks, significantly improving workflow efficiency within the project.
	   o Managed daily operations and maintenance of automation scripts to ensure system reliability.
	 • **Incident & Infrastructure Management:**
	   o Monitored daily system alerts and managed troubleshooting for complex infrastructure issues across a multi-cloud landscape.
	   o Developed and maintained standardized operating procedures for incident response.
	 • **Knowledge Sharing & Enablement:**
	   o Conducted technical training sessions for project members to facilitate the adoption of automation tools.
	   o Managed the seamless transition and handover of operational knowledge to ensure continuous service delivery.

07/2020 - 03/2023	■ Manufacturing: Multi-National Infrastructure Operations & Service Management
	◎Project Overview: Managed system operations and incident management for a major Japanese manufacturer, ensuring the stability of critical infrastructure across Japanese and Singaporean entities.
	Key Responsibilities & Achievements:
	- **Infrastructure Operations & Technical Execution:**
	o Performed hands-on technical tasks and weekly alert responses for AIX (UNIX) and Linux systems.
	o Executed service requests and system maintenance to ensure 24/7 operational continuity.
	- **Global Stakeholder Management & Reporting:**
	o Lead Incident Reporting: Conducted weekly incident management briefings for the Japanese client entity.
	o Strategic Analysis: Delivered monthly operational analysis and performance reports to the client's Singapore-based entity.
	- **Knowledge Management & Vendor Coordination:**
	o Supported Standard Operating Procedures and technical manuals for infrastructure maintenance.
	o Cross-Border Enablement: Led training sessions and knowledge transfer initiatives for dispatch staff and offshore delivery teams, including IBM and Kyndryl members in India.
04/2020 - 06/2020	Onboarding

■ Certification

- ❖ AI in Supply Chain Forecasting and Risk Management (01/2026)
- ❖ Microsoft Certified: Azure AI Fundaments (12/2025)
- ❖ GenAI for Supply Chain Optimization (12/2025)
- ❖ Google Foundations of User Experience (UX) Design (12/2025)
- ❖ SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Private Edition (03/2024)
- ❖ SAP Certified Application Associate - Sourcing and Procurement (03/2023)
- ❖ SAP Certified Consultant - SAP S/4HANA System Administration (06/2022)
- ❖ ERE (Economics Research Examination) - [Rank S] (12/2017)
- ❖ TOEFL iBT: [95] (07/2016)

■ Education

04/2018 - 03/2020

Business Administration - Kyoto University, Japan (Master)

09/2013.09 - 06/2017

Japanese - Shandong University of Political Science and Law, China (Bachelor)

Economics (Self-Study)

■ Language

English: Full Professional Proficiency (TOEFL iBT: 95 / CEFR C1 equivalent)

Japanese: Near-native

Chinese: Native

Danish: Beginner, currently pursuing further studies.
